Allround and Whitewater Paddles

Available lengths: 196, 198, 200, 202, 204 (45°)
Weight: ca. 1250 g

Workblade Nylon

Maximum fun at every level: freestyle, creeking and rodeo. The Nylon-20 Box-Construction saves weight and increases the stiffness of the blade. The homogeneous material is highly abrasion resistant. No chipping like more expansive Fiberglass paddles. The extra strong glassfiber shaft offers 2 ovalised grip sections for maximum paddle control.

Available lengths: 196, 198, 200, 202, 204 (60 °)
Weight: ca. 1350 g

Topline

Schlegel's classic model has dominated the rivers of our planet for more than 10 years. Now improved with the very latest materials: fibre-reinforced, high-density foam for stiffer blades, aluminium protective insert around the edge of the blade. In addition there is the comfort of soft foam hand grips which minimise heat loss to the hands whilst increasing grip control. The blade is reinforced by the shaft running along almost its entire length, allowing the most powerful paddle strokes in the toughest white water.

Available lengths: 196, 200, 204, 208, 220tb (45°)
Weight: ca. 1250 g

Whitewater Duralen

This multi-purpose paddle is suitable for all whitewater as well as for pool training. The Heavy-Duty Alloy shaft is now standard, making it perfect for instruction, rental and club use.

Available lengths: 180, 190 (45°)
Weight: ca. 1150 g

Duralen Junior

This is the perfect paddle for the young paddler. It is a scaled-down model of the Duralen Whitewater, with smaller blades and a thinner shaft for smaller hands.

Touring Paddles

Voyage Nylon

An asymmetric design for smooth paddling. The thin blades and dihedral powerface minimise flutter and give perfect power transmission. Reinforced Nylon blades make this a great all-round touring paddle.

Available lengths: 215, 220, 225, 230, 220tb, 230tb,
240tb (45°) tb = 2-piece
Weight: ca. 1250 g

Voyage Wood

Unsurpassed performance with the magical feel of a natural material, excellent design and superb craftsmanship. This fine wooden paddle will accompany you on your most memorable journeys.

Schlegel
TRADITIONALS
WOOD

Available lengths: 215, 220, 225, 230 (60 °)
Weight: ca. 1200 g

Voyage Duralen

Asymmetrical blade - allowing a low angle paddling action - saving you energy over long distances. Lightweight and strong with our HD-Alloy shaft.

 HEAVY-DUTY

Available lengths: 215, 220, 225, 230, 220tb, 230tb, 240tb (45°) tb = 2-piece
Weight: ca. 1250 g

Schlegel-2-pc connectors

Schlegel ferrules are made from fibre-reinforced epoxy, with an extra large press button. High strength with fine tolerances prevents wobbling and ensures a long life.

Weight: plus ca. 50 g

Materials

Schlegel Nylon-20

Nylon-20 is the latest material for high impact resistance and is processed under high pressure using advanced spray-cast technology. Small carbon-fibre filaments in the raw material give the product extra stability and strength.

- Impact resistant
- Thin blades
- Hard wearing, less chipping

Schlegel Tech III plus Hardfoam

When introducing PU-composite technology 20 years ago Schlegel started a revolution in the paddle market. From this moment paddles were stronger, lighter and more reliable. The PU-composite technology has improved again and again through the years, ozone-friendly propellant is standard nowadays and better foam with integral fibre filaments allows thinner cross sections and less weight.

- Volume (blade flotation) saves energy and gives better 'feel'.
- Extremely reliable, the shaft reinforces the entire length of the paddle.
- Integral aluminium edge insert protects against abrasion

Schlegel Duralen

Duralen is an improvement on the classic RIM-process. The whole paddle and shaft are made together in the mould under high pressure. Check out the unique shape of Schlegel Duralen paddles. At the edge where you need strength and protection you will find more material, other areas are thinner to save weight where possible.

- Best price/performance ratio
- Pool training and polo - Duralen is friendly to your tiles and fellow paddlers
- Perfect for instruction and centre use

Schlegel traditional wood

The warm handle and magical feel of wood is unsurpassed. Softwoods are used in the right places to achieve the correct weight while hardwoods are used to give the paddle strength, rigidity and protection. On longer trips you will never want to be without a Schlegel traditional wood paddle.

- Warm with good grip
- Flexible and tendon/joint friendly
- No corrosion in salt water

Schlegel.
TRADITIONAL
WOOD

All wooden canoe paddles come with a resin insert at the tip for protection as a standard.

Schlegel-HD-shaft:

Made from high-quality anodised aircraft alloy with a very high breaking point, saves weight and increases the life of your paddle. Now also standard on the Voyage Duralen and Duralen Whitewater.

Canoe Paddles

The Ontario/Michigan and Superior/Hudson make the ideal combination of bow- and stern- paddle: at the bow a rounded tip for smooth entry, at the stern a larger blade for effective steering strokes.

Ontario

Popular and proven all-round canoe paddle made from select aspen, cedar and ash.

Schlegel.
TRADITIONAL
WOOD

Available lengths: 145, 150, 155
Weight: ca. 800 g

Michigan

The stern paddle to match the Ontario, straight tip and larger blade.

Schlegel.
TRADITIONAL
WOOD

Available lengths: 145, 150, 155
Weight: ca. 800 g

Superior

When you are on longer trips you will enjoy a paddle that is smooth and flexible in the water and gives back energy at the end of the stroke for additional propulsion. This can be achieved with the right combination of quality woods. The blade of the Superior is made from selected black cherry, the shaft from ash.

Schlegel.
TRADITIONAL
WOOD

Available lengths: 145, 150, 155
Weight: ca. 850 g

Hudson

The stern paddle to match the Superior, straight tip and larger blade.

Schlegel.
TRADITIONAL
WOOD

Available lengths: 145, 150, 155
Weight: ca. 850 g

Canoe Duralen

Canoe paddles must have a lot of pull, be light weight and well balanced, and have a strong blade tip. That's what you'll find with the Duralen Canoe: strength where you need it but with less material where weight can be saved. The result is a high performance paddle for everyday use. Ideal for canoeing, rafting, centre and rental use.

Available lengths: 145, 150, 155, 160, uncut.
Weight: ca. 850 g

Winnipeg

Made from Canadian Aspen, rounded tip with resin insert - a quality entry level paddle.

Schlegel.
TRADITIONAL
WOOD

Available lengths: 145, 150, 155
Weight: ca. 800 g

Kayakers as well as canoeists need a paddle that is well balanced, dependable and has a good pull in the water. A paddle has to feel good and look great. Many subtle but important improvements have led to Schlegel equipment that meets the demands of today's paddlers.
